PROFILE

Final-year B.Tech Computer Science student with hands-on experience designing, automating, and supporting AWS cloud infrastructure. Skilled in AWS core services including EC2, VPC, IAM, Lambda, S3, RDS, and ECR, with practical experience in Terraform, Docker, GitHub Actions, Linux, and cloud monitoring. Built and deployed a multi-region AWS disaster recovery platform with automated failover, CI/CD, infrastructure as code, monitoring, and secure OIDC-based deployments. Strong problem-solving and troubleshooting skills with a focus on reliable, secure, and automated cloud systems.

EDUCATION

THE NEOTIA UNIVERSITY

West Bengal

B.Tech – Computer Science and Engineering (Cybersecurity Specialization)

2023 – Present

- Expected graduation: July 2027
- CGPA: 8.37 / 10.0

EXPERIENCE

INDIAN INSTITUTE OF TECHNOLOGY (IIT) JAMMU

Remote, India

Technical Intern

Jun 2025 – Aug 2025

- Scanned Linux lab networks with Nmap and analyzed traffic in Wireshark to identify misconfigurations.
- Built a controlled MITM lab with one Kali attacker and one Ubuntu victim to demonstrate ARP spoofing.
- Used Bettercap to capture HTTP login credentials and documented the exposure risk and possible fixes.

SKILLS

Cloud Platforms (AWS): EC2, VPC, IAM, Lambda, S3, RDS, ECR, SNS, AWS CLI

Infrastructure as Code: Terraform, Modular IaC, S3 Remote State, DynamoDB State Locking

DevOps & CI/CD: Docker, Docker Compose, GitHub Actions, CI/CD Pipelines, Git

Cloud Networking & Security: VPC Networking, Security Groups, Subnets, DNS, TCP/IP, IAM-Based Access Control

Monitoring & Observability: Prometheus, Grafana, AlertManager

Scripting & Programming: C, C++, Bash, Bash Scripting

Operating Systems: Linux (Ubuntu), Windows

PROJECTS

RESQOPS – AUTOMATED DISASTER RECOVERY ORCHESTRATION PLATFORM

GitHub

AWS (EC2, VPC, RDS, IAM, EC2, Lambda, SNS, S3), Terraform, Docker, GitHub Actions, Prometheus, Grafana

- Deployed multi-region AWS DR platform (Mumbai–Singapore) via Terraform, provisioning 20+ resources with S3/DynamoDB locking; failover under 5 minutes per RTO/RPO targets.
- Built OIDC-secured CI/CD (Actions → ECR) for Dockerized app; Lambda + SNS auto-triggers failover on failure.
- Set up Prometheus/Grafana/AlertManager monitoring with Slack alerts within 1 minute of downtime.

DOCKERIZED NGINX DEPLOYMENT ON AWS EC2

GitHub

Docker, Nginx, AWS EC2, GitHub Actions, Docker Hub, Linux

- Built and deployed a custom Nginx Docker image on AWS EC2, serving static web content with custom Nginx configuration.
- Implemented GitHub Actions CI to automatically build and push versioned Docker images to Docker Hub on every push to the main branch.
- Configured container auto-restart for reliability and validated deployment on AWS EC2 using Docker.
